Studex System 75 unkompliziert, sanft und sicher Ohrlöcher stechen - easy, gentle and safe way to pierce

Und so funktioniert es - *How it works:*

1 Reinigen Sie die Ohrleppchen mit einem Alkoholtupfer und markieren Sie die Stelle, an welcher das Ohrloch gestochen werden soll
Clean the earlobe with an alcohol pad and mark the spot where the ear will be pierced.

2 Trennen Sie die beiden Blisterverpackungen an der vorgesehenen Perforation ab und entfernen Sie das Siegelpapier.
Disconnect the two blister packs at the intended perforation and remove the paper seal.

3 Entnehmen Sie die Kartusche vorsichtig aus der Blisterverpackung.
Remove the cartridge from the blister pack.

4 Richten Sie die Ohrsteckerspitze auf die markierte Stelle und drücken Sie die Kartusche leicht zu, um die Ohrsteckerspitze präzise zu positionieren. Drücken Sie die Kartusche bis zum Anschlag durch.
Align the stud tip at the marked spot and press the cartridge gently to position the tip accurately. Press the cartridge through until it stops.

5 Lösen Sie den Druck von der Kartusche und ziehen Sie diese vorsichtig senkrecht nach unten ab. Die Pousette wurde automatisch auf dem Stecker positioniert.
Release the pressure of the cartridge and carefully pull it down vertically. The Pousette has been automatically positioned on the stud.
